

AAGNII AI MASTER PLAN :

1. The core design :

Inspired or the ui ux and all exactly same to same like the sarvam.ai website same saffron and blueish light falling from top and bottom navbar and all in the same to same shape and design written AAGNI AI on it same to same icon sample and all the ui design include proper claymorphism , glassmorphism , neomorphism and liquid glass features and design clear in light background white creamy shade no complete white.

Recreate the same level of visual sophistication, spacing system, layout hierarchy, typography scale, navigation behavior, hover interactions, gradients, shadows, and modern premium feel.

Style Direction:

- Extremely clean and premium
- Minimalistic luxury design
- Apple + Linear + Sarvam aesthetic
- Large whitespace
- Rounded corners everywhere
- Soft glassmorphism
- Frosted panels
- Light premium theme
- Enterprise-grade appearance
- Calm and trustworthy
- AI-native experience
- No clutter
- No neon cyberpunk
- No generic SaaS templates

COLOR SYSTEM

Background:

#F8F8FA

Primary Accent:

Deep Indigo #23294D

Secondary Accent:

Warm Saffron Orange #FF7A1A

Soft Gradient:

Top:

#FF7A1A

Middle:
#FFD6B2

Bottom:
#E7ECFF

Use massive blurred gradient glow behind hero section.

TYPOGRAPHY

Font:
Plus Jakarta Sans or times new roman

Hero Title:
72-88px

Section Titles:
48-56px

Body:
18-20px

Letter spacing slightly tightened.

Very similar hierarchy to Sarvam.

NAVBAR

Floating pill-shaped navbar.

Properties:

- Width: 92%
- Center aligned
- Rounded 9999px
- Glassmorphism
- Soft border
- Backdrop blur
- Light shadow

Left:
AAGNI AI logo and name

Center:

Platform

features

Developers menas my info

About menas about aagni ai

Right:

Sign Up button

Log in button

Buttons:

Primary:

Dark indigo gradient

Secondary:

White glass button

Hover:

Lift + shadow + subtle scale

Navbar remains sticky while scrolling.

TOP ANNOUNCEMENT BAR

Thin floating strip above navbar.

Examples:

" India's Local AI Assistant is Live"

With

"supporting Hindi, Punjabi, English & 22+ indian languages"

Centered text in above text foot

Minimal design.

HERO SECTION

Massive hero section.

Background:

Huge blurred saffron-to-blue gradient.

Center content:

Small badge:

 Made in India Made for India

Headline:

"AI for Every Indian"

or

"India's Local AI Assistant"

Very large typography.

Subheadline:

Speak naturally.

Think locally.

Build globally.

Buttons:

Try AAGNI AI

Contact us

Hero height:

90vh

Perfect center alignment.

MEGA MENU

When hovering Platform:

Open large floating mega menu.

Structure:

Left Column:

AAGNI Chat

AAGNI Voice

AAGNI Vision

AAGNI Agents

Right Side:

Large feature card.

Card includes:

Gradient background

Rounded corners

Large illustration

Feature description

Smooth 300ms animation.

FEATURES SECTION

Alternating layout.

Large cards.

Rounded 40px corners.

Soft shadows.

Each card contains:

Icon

Title

Description

Visual mockup

Spacing identical to enterprise SaaS websites.

AI MODELS SECTION

Grid cards.

Show:

AAGNI Mini

AAGNI Pro (coming soon)

AAGNI Ultra (coming soon)

Each card:

Rounded 32px
Glassmorphism
Hover lift effect

DEVELOPER SECTION

Use this content:

Developers Page

Section Heading

Built by Engineers, For Builders

Subheading

Meet the engineer behind AAGNI AI's architecture, multimodal systems, and AI infrastructure.

Developer Card

Bhavya Kansal

AI/ML Engineer · Full-Stack Developer · Multimodal AI Researcher

Focused on building scalable AI systems, multilingual language models, computer vision solutions, and production-ready AI infrastructure for Indian users.

Specializing in:

- Large Language Models (LLMs)
 - Generative AI
 - Computer Vision
 - AI Agents
 - Full-Stack Development
 - Cloud Infrastructure
 - AI API Systems
-

Quote Card

"The next generation of AI won't be defined by bigger models alone. It will be shaped by systems that understand language, culture, context, and the people they serve."

Collaboration Section

Use a separate premium glass card below the profile section:

Collaboration & Research

Interested in:

- AI Research
- Open Source Collaboration
- Startup Partnerships
- Industry Projects
- Academic Research
- AI Infrastructure Development

Reach Out

 kansalbhavya27@gmail.com

 multimodexai@gmail.com

Create a premium Developer Profile section inspired by Sarvam's founders section.

Layout:

- Large rounded container (40px radius)
- Soft saffron-indigo gradient background
- Glassmorphism effects
- Large circular profile image on left
- Profile image size 320px
- Double border around image
- Small online status indicator

Right side:

- Developer Name
- Professional Role
- Detailed engineering bio
- Premium quote card
- Skill tags

Typography:

- Elegant serif heading for name
- Sans-serif for body

Animations:

- Fade in on scroll
- Floating gradient glow
- Hover effects on skill tags

Below the profile card:

Create a dedicated Collaboration section.

Use a glassmorphism card.

Include:

Title:

"Collaboration & Research"

Subtitle:

"Open to impactful AI projects, research initiatives, and technical collaborations."

Show both email addresses as premium clickable contact buttons.

Overall design should match the visual sophistication of Sarvam.ai while maintaining originality and a modern AI engineering identity.

FOOTER

Massive premium footer.

5 columns.

Products

Developer

About aagni

Connect

Background:

Very soft orange-blue gradient.

Large logo on left.

Certifications area.

Bottom copyright row.

ANIMATIONS

Use Framer Motion.

Requirements:

Fade Up

Blur In

Scale In

Duration:

0.4-0.6s

No excessive animations.

Everything should feel premium and expensive.

TECH STACK

Next.js 15
TypeScript
Tailwind CSS
Framer Motion
shadcn/ui

Responsive:
Mobile First

Desktop:
1440px optimized

Tablet optimized

Mobile optimized

IMPORTANT

The final result should feel like a \$50M funded AI company website.

It should immediately compete visually with:

- Sarvam.ai
- OpenAI
- Anthropic
- Perplexity
- Cursor
- Linear

Maintain the same premium design language, spacing quality, component architecture, navigation experience, glassmorphism, gradients, typography hierarchy, and visual polish level as Sarvam.ai while using completely original branding and content for AAGNI AI.

Section Title

The AI Platform India Talks To

Subtitle:

Built on frontier-grade multilingual AI infrastructure.
Chat, Speak, Listen, Understand, and Act — all from one platform.

Interactive Capability Dashboard

Create a large premium card exactly like Sarvam.

Tabs on top:

-  AI Chat
 -  Text to Speech
 -  Speech to Text

AAGNI Pro Features

✓ AI Agents

✓ Long Memory

✓ Research Mode

✓ Browser Tools

✓ Team Workspaces

✓ API Access

AAGNI Ultra Features

✓ Autonomous Agents

✓ Custom Models

✓ Enterprise Deployment

✓ RAG Infrastructure

✓ Fine-Tuning

✓ Dedicated Compute

Important Trust Line

Instead of hiding Sarvam, be transparent.

Add a small line:

Powered by state-of-the-art Indian foundation models and proprietary AAGNI orchestration systems.

Then inside architecture modal:

Foundation Models:

Sarvam 105B as core | fine tuned llama models and more

Inference Layer:

AAGNI Runtime

Memory Layer:

AAGNI Memory Engine

Voice Layer:

AAGNI Voice Stack

Agent Layer:

AAGNI Agents

Visual Design Prompt

Create a premium interactive AI capability showcase inspired by Sarvam.ai.

Large rounded container.

45px border radius.

Soft white glassmorphism.

Massive saffron-to-indigo gradient glow.

Tabbed interface.

Smooth transitions between tabs.

Framer Motion animations.

Large workspace area on left.

Feature panel on right.

All demos should feel realistic and production-ready.

Use elegant typography, subtle shadows, premium spacing, and enterprise-grade polish.

The section should communicate that AAGNI is a complete multimodal AI platform supporting:

Chat

Text to Speech

Speech to Text

Voice Agents

Vision AI

Document AI

Additional Pro and Ultra capabilities should be previewed in a premium roadmap experience.

Design quality should rival Sarvam.ai, OpenAI, Anthropic, and Perplexity.

🔥 Ek cheez aur — AAGNI currently Sarvam 105B use kar raha hai, homepage par **"Powered by Sarvam 105B"** ko hero mein mat dikhana. User ko product yaad rehna chahiye, backend provider nahi. Isko architecture/modal/documentation ya footer trust section mein mention karo. Jab AAGNI ka apna fine-tuned stack aa jaye tab usko highlight karna. That's the stronger product strategy. 100

AAGNI AI Footer Reveal Section

Create a premium Footer Reveal experience inspired by the best modern SaaS websites such as Linear, Stripe, Vercel and Sarvam.ai.

IMPORTANT:

Do not create a traditional footer.

The footer should remain hidden beneath a large CTA section and only gradually reveal itself as the user scrolls.

SECTION STRUCTURE

Developer Section

↓

Roadmap Section

↓

FAQ Section

↓

Premium CTA Banner

↓

Reveal Footer

CTA SECTION

Create a massive full-width premium CTA container.

Properties:

- Border Radius: 48px

- Width: 92%
- Centered
- Relative positioning
- Overflow hidden
- Premium shadow
- Glassmorphism border

Background:

Top:
Deep Indigo #23294D

Middle:
Soft Blue #AEBFFF

Bottom:
Warm Saffron #FF8A1C

Add:

- Large radial gradients
- Noise texture
- Globe wireframe pattern
- Floating particles
- Soft moving light effects

HEADLINE

Ready to Build with AAGNI?

Typography:

72px desktop
48px tablet
32px mobile

Elegant serif font.

Subheading:

India's Local AI Platform for Chat, Voice, Agents, Vision and Multimodal Intelligence.

CTA BUTTONS

Primary Button:

Start Building

Style:

Dark Indigo

Gradient

Large pill shape

Hover:

12+

AI Models

2M+
API Requests

5000+
Developers

<500ms
Latency

Each stat should animate into view.

REVEAL FOOTER EFFECT

This is the most important part.

The footer must initially stay hidden underneath the CTA section.

As the user scrolls:

- CTA section remains visually dominant.
- Footer slowly emerges from underneath.
- Background glow becomes visible.
- Footer content fades upward.
- Smooth parallax effect.
- Sticky transition feel.

Use Framer Motion and CSS transforms.

The reveal must feel luxurious and premium.

FOOTER DESIGN

Background:

Soft Gradient

Top:
#E8EEFF

Middle:
#F7F8FC

Bottom:
#FFCF9A

Add subtle blur.

LEFT SIDE

AAGNI AI Logo

Tagline:

multimodexai@gmail.com

ANIMATIONS

Framer Motion

Reveal on Scroll

Fade Up

Blur In

Parallax

Glow Tracking

Floating Particles

Staggered Footer Columns

RESPONSIVE

Desktop

Tablet

Mobile

Maintain reveal effect across all devices.

GOAL

The final experience should feel like a \$100M funded AI company website.

The footer reveal should be one of the most memorable sections of the entire website and leave users with a premium lasting impression before exiting the page.

Extra instructions

Implement the footer reveal using:

- Framer Motion
- useScroll()
- useTransform()
- sticky positioning
- z-index layering

CTA card should stay visually above the footer while scrolling.

Footer should emerge from underneath instead of appearing abruptly.

Ensure smooth 60 FPS animations and production-ready code quality.

recommendation: Footer reveal ke CTA banner ke center mein ek **animated India map made from glowing AI nodes** lagao jo hover par connect/disconnect ho. Sarvam ke globe se zyada memorable lagega aur AAGNI ki "India-first AI" identity instantly establish karega. 🇮🇳 ⚡

AAGNI AI Authentication Modal Prompt :

Create a world-class authentication modal inspired by the visual sophistication of Sarvam.ai, Linear, Arc Browser, Anthropic and OpenAI.

The modal should appear when users click:

- Sign Up
- Login
- Get Started
- Try AAGNI

MODAL BEHAVIOR

Do NOT open a generic popup.

The entire page should:

- Dim softly
- Blur background
- Reduce brightness slightly
- Keep navbar visible behind blur

Animate modal from center.

Animation:

- Scale 0.95 → 1
- Opacity 0 → 1
- Duration 400ms
- Smooth easing

Use Framer Motion.

MODAL CONTAINER

Width:

520px Desktop

420px Tablet

100% Mobile

Style:

- Rounded 36px
- Soft glassmorphism
- Frosted white background

- Backdrop blur
- Border: rgba(255,255,255,0.4)
- Premium shadow

TOP SECTION

GOAL

The authentication experience should feel premium enough that users instantly trust AAGNI as a serious AI platform.

The modal should feel closer to an operating system onboarding experience than a traditional login form.

Extra Premium Touches 🔥

Add these inside the modal:

🌐 Supports Hindi, Punjabi, English & Hinglish

⚡ Average response time <100ms

OAuth Buttons Order

Continue with Google

Continue with GitHub

Email Sign Up

Reason:

- 80–90% users choose Google
- GitHub attracts developers
- Email is fallback

Modal Headline Options

Option 1

Welcome to AAGNI AI

Option 2

Build with India's AI

Option 3

Start Your AAGNI Journey

Option 4 (Best)

AI for Every Indian 🇮🇳

Ye Sarvam ke aesthetic ke saath perfectly blend karega aur poori site ka premium feel maintain rakhega. 🚀✨

MASTER AAGNI CHAT UI DESIGN PROMPT

Design a next-generation AI Chat Interface for AAGNI AI.

The UI should combine:

- ChatGPT simplicity
- Perplexity organization
- Claude elegance
- Arc Browser aesthetics
- Sarvam color language
- AAGNI branding

The experience should feel like an AI Operating System.
